➞ Installation Instructions

Detailed instructions for installing the product are available in the download section at <https://www.hella.info>.

CE marking

The HELLA pleated insect screen complies with the declaration of performance according to the Construction Products Regulation, and, in case of proper use, corresponds to the basic requirements of the harmonised standard EN 13561. The respective declaration is deposited with the manufacturer.

The CE identification applies for the delivery status of the product. The product mounted meets the requirements of the specified standard only, if

- ➔ during installation the information and instructions given in these instructions as well as the information and instructions of the manufacturers of the screws have been observed,
- ➔ the product is installed with the recommended type and number of fasteners/screws.

No changes, rebuildings or extensions, with the exception of those described in these instructions, are allowed with this product. The fixed CE-label expires with any change, rebuilding or extension.

Safety instructions

These installation instructions refer to prefabricated elements, that (1) for 100% are made from parts, which are defined by us, and (2) which are made in manufacturing processes, which are defined by us too; in all other cases we do not provide any guarantee!

The safety instructions as well as the appropriate instructions must be read carefully before installation and use. In case of non-observance of the directions and information given in these instructions and in case of improper installation and operation or unintended use, the manufacturer shall not accept any warranty claims concerning any damage to the product. In these cases, the liability for consequential damage to any parts or persons is ruled out as well.

- Follow the described installation steps and pay attention to recommendations and notes.
- Keep these instructions in a safe place.
- All installation and removal works, as well as maintenance and repair works are only allowed to be carried out by authorised and qualified specialist staff.
- Observe the regulations for prevention of accidents of the employer's liability insurance association!
- Before operation check the unit for visible damage. If the unit is damaged, it should not be used; please consult authorized specialist staff immediately.
- Risk of injury and accident due to the weight of the product!
- To operate the unit only use the handles and handle rails provided to prevent injuries to persons and damage to the unit.

Danger of suffocation!

Ensure that the foil cannot get into the hands of children. Keep the foil in a safe place.

Safety instructions

Operation in case of frost:

In case of frost externally mounted pleated insect screens may freeze shut. Avoid using force to operate the unit with snow or ice. In addition we recommend to unhinge the insect screen elements and store them in a dry room during the winter months.

Danger of squashing with movable parts:

Pleated insect screens are only allowed to be operated with the handle rails provided. When handling with these elements it must be ensured that no persons or obstacles are in their operating range.

Using the product for the wrong purpose:

HELLA's pleated insect screen do not protect toddlers or pets from falling down. Do not lean against the pleated insect screen, because it is not designed to carry additional loads – danger of fall hazards!

Overlooking due to its transparency:

Pleated insect screens run the risk of being overlooked. To prevent damage it is therefore recommended to make children or guests aware of these insect screen elements.

Servicing, maintenance and repair

Cleaning:

Externally mounted units can get dirty in the course of time. This will not reduce the usability of your unit. The powder-coated parts will remain presentable for longer, if they are cleaned regularly with a soft woollen cloth.

Do not use solvents, alcohol (rubbing alcohol) or scouring cleansing agents! Use a mild household cleaner and a soft cloth to wash down fingerprints and light grease- or oil patches. Rinse off with clear water and dry with a soft cloth.

Usually it is sufficient to clean the insect screen carefully with a vacuum cleaner. Regularly remove the remains of insects to avoid that birds pick holes into the insect screen cover (damage to the screen).

Remove regularly dirt or objects from the guide and slide rails.

Servicing, maintenance and repair

Maintenance:

Regularly check the unit and the control elements for signs of wear and damage and the product for stability.

All inspection and maintenance work must only be performed by a relevant specialist company.

Check the mechanical parts of your unit for visible damage. Do not use the unit, if any damage is found.

Spray the cords in the guide rails with silicone spray every three months to keep the unit running smoothly.

Repair:

Improper repair works may cause both risk of injury to persons or damage to the units. Repair works must be carried out by a specialised company.

Only use original spare parts from HELLA.

Operating guidelines

Pleated blind:

Opening / closing the pleated insect screen by moving the handle rail via recessed grips that are provided on both sides.

Due to the retention force of the holding magnet, increased effort is required to open the pleated insect screen, when it is closed completely.
