HELLA

COLOUR WORLDS

COLOURFUL LIKE LIFE ITSELF

Coating quality

We coat the surfaces in facade quality according to the guidelines of the Gütegemeinschaft für Stückgutbeschichtung (= Quality Control Association for the Coating of Building Components; GSB- Premium). Highly weatherproof describes a coating with a higher UV resistance as per Qualicoat Class 2 - we recommend this coating in case of especially strong sun exposure.

COLOUR WORLDS

Standard colours

Available in silk gloss, matt and matt fine structure*

MULTICOLOR

Available in silk gloss, matt and matt fine structure*

VSR Colours

**Verband Schweizerischer Anbieter von Sonnen- und Wetterschutzsystemen
(= Association of Swiss suppliers of sun and weather protection systems)**

Available in silk gloss and matt

HWF Colours

Highly weatherproof

Available in matt

1000 COLORS

NCS, anodic-like powder-coating colours, (anodized look), fluorescent and pearl colours from RAL Classic K7, colours from special colour charts, Sikkens, ...

Available in silk gloss, matt and matt fine structure*

* matt fine structure creates special light effects due to a rough surface.
This surface adapts especially well to plaster structures of an adjacent wall.

Boxes and guide rails are available in all standard colours, MULTICOLOR, VSR colours, HWF colours and 1000 COLORS.

For awnings and pergolas we recommend the surfaces matt and matt fine structure.

For technical reasons, slight deviations of the colours shown in this document to the original colours are possible.
Due to different procedures in the production, colour differences between slats/roller shutter profiles and powder-coated aluminium parts cannot be avoided.
Regarding colour shade and brightness, our colours may differ from the original colours due to different production techniques.

HWF Colours

HWF stands for "HIGHLY WEATHERPROOF" and thus for colours that do not fade even in case of heavy sun exposure.

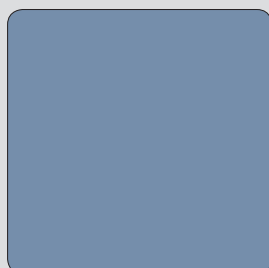

The selected colours are available against a small set-up fee and ensure fresh appearance that does not fade for many years thanks to special UV protection.

1000 COLORS

**„1000 COLORS“ means:
Upon request, everything is possible with HELLA.**

If you have special wishes for the coloured coating of sun protection boxes and profiles beyond Standard colours, MULTICOLOR, VSR- and HWF Colours, you can practically choose the shade and surface quality freely for a set-up fee. E.g. NCS, fine structure according to RAL, anodized look* (C31PB, C32PB, C35PB), fluorescent and pearl colours from RAL K7 Classic, colours from special colour charts, Sikkens, ...

* Anodized look imitates the surface of the anodization, however, offers a higher colour accuracy.

Specific powder regulations must be inquired separately.

Outdoor blinds & venetian blinds

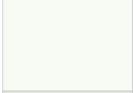

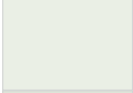

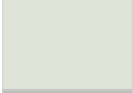

The prettiest shape to control the daylight.

They are the real "all-rounders" and ensure optimum indoor climate: Heat protection due to reflection of the sunlight in front of the facade, control of the incoming light up to excellent blacking out via adjustable slats, protection against bad weather due to the possibility to close the slat system completely. The versatile range of colours of the HELLA Colour world fits to any architecture and leaves no wishes unfulfilled.

Slats in special colours and special designs are available for a surcharge.

The slats in the colours C31, C32, C33, C34, C35 are lacquered in an anodized look. With regard to colour shade and brightness, the slat colours can differ from the colour of the anodized parts.

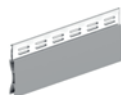

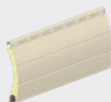

Roller shutters

Good design is the combination of shape and function, of technical perfection and visual aesthetics.

HELLA roller shutters are available in a wide range of colours, colourful as life itself. Colours are emotions, they have a formative influence on the style of buildings and rooms. Whatever a building shall express, howsoever the personal preference is pronounced – we have the roller shutter that suits the architecture and the attitude towards life of our costumers.
