HELLA

IL MONDO DEI COLORI

COLORATO COME LA VITA

Qualità della verniciatura

Le verniciature vengono eseguite secondo le disposizioni dell'associazione qualità per la verniciatura dei materiali per facciate (GSB-Premium). Altamente resistente agli agenti atmosferici, questa verniciatura garantisce una maggiore resistenza ai raggi UV secondo Qualicoat Classe 2, ed è ideale in caso di prolungata esposizione ai raggi solari.

IL MONDO DEI COLORI

Colori standard

Disponibili nelle versioni effetto seta, opaco e opaco testurizzato*

MULTICOLOR

Disponibili nelle versioni effetto seta, opaco e opaco testurizzato*

Colori VSR

Associazione dei fornitori svizzeri di sistemi per la protezione dal sole e dalle intemperie

Disponibili nelle versioni effetto seta e opaco

Colori HWF

Altamente resistenti alle intemperie

Disponibili come colori opachi

1000 COLORS

NCS, colori in tinta anodizzata (ottica anodizzata), colori fluorescenti e perlati da RAL K7 Classic, colori di raccolte speciali, Sikkens, ...

Disponibili nelle versioni effetto seta, opaco e opaco testurizzato*

* Testurizzato: superficie ruvida con effetti speciali alla luce.
Questa superficie si sposa particolarmente bene con i muri intonacati.

I cassonetti e le guide laterali sono disponibili in tutti i colori standard, MULTICOLOR, VSR, HWF e 1000 COLORS.

Per le tende da sole e le pergole consigliamo le superfici opache e opache testurizzate.

I colori originali possono presentare differenze rispetto a quelli stampati sul catalogo.
A causa di differenti procedure nella produzione, non possono essere evitate differenze di colore tra lamelle/profilo avvolgibili e parti in alluminio verniciate a polvere.
I nostri colori possono variare dai colori originali a causa di diversi processi di produzione per quanto riguarda il colore e la brillantezza.

Colori HWF

HWF significa “RESISTENTE ALLE INTEMPERIE”. I colori HWF non sbiadiscono in caso di forte irraggiamento solare.

I colori selezionati sono disponibili con un ridotto forfait e offrono, attraverso una speciale protezione dai raggi UV, un look fresco che non sbiadisce nemmeno dopo molti anni.

1000 COLORS

**„1000 COLORS“ significa:
su richiesta, con HELLA tutto è possibile.**

Coloro che hanno esigenze particolari per la verniciatura di cassonetti e profili, oltre ai colori standard MULTICOLOR, VSR e HWF, possono scegliere liberamente colore e qualità delle superfici con un forfait per verniciatura fuori standard. Ad esempio: NCS, RAL testurizzato, ottica anodizzata* (C31PB, C32PB, C35PB), colori fluorescenti e perlato RAL K7 Classic, colori di raccolte speciali, Sikkens, ...

* L'ottica anodizzata simula l'effetto dell'anodizzazione, con una maggiore definizione del colore.

Istruzioni particolari relative alla polvere devono essere richieste e quotate separatamente.

Frangisole & veneziane

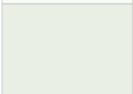

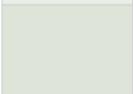

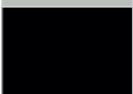

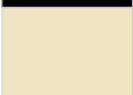

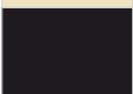

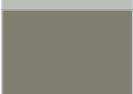

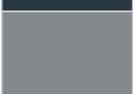

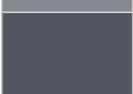

**Il modo più elegante
per indirizzare la luce del giorno.**

Sono veri e propri "tuttofare" e offrono un clima interno ottimale: protezione dal calore grazie alla deviazione dei raggi solari, regolazione dell'infiltrazione della luce fino ad un ottimale oscuramento tramite orientamento delle lamelle, protezione dagli agenti atmosferici quando le lamelle sono chiuse. La ricca tavolozza delle tonalità del Mondo di colore HELLA si inserisce in ogni architettura, andando incontro a tutte le esigenze.

Il colore e la lucentezza delle lamelle può differire rispetto alle parti anodizzate.

Avvolgibili

Design significa saper coniugare perfettamente forme, funzionalità, perfezione tecnica ed estetica.

Gli avvolgibili HELLA sono disponibili in una vasta gamma di colori, tanto ampia quanto la nostra immaginazione. I colori suscitano emozioni, contraddistinguono lo stile delle strutture e degli ambienti. Quello che un edificio deve riuscire ad esprimere è la personalità di ognuno di noi. I nostri avvolgibili si adattano all'architettura e allo stile di vita dei nostri clienti.
