INSECT SCREENS

PLEATED INSECT SCREEN ISPL18
PLEATED INSECT SCREEN ISPL18

USEFUL, VERSATILE AND EFFECTIVE

The pleated insect screen from HELLA closes most importantly doors and doorways for insects.

Thanks to the recessed handles on the inside and the outside, it is possible to operate the pleated blind over the entire height from both sides. It can be mounted perfectly behind any sun protection device, because no handles protrude.

The especially low bottom running rail facilitates cleaning and passage.

Installation details

The cable guidings stabilize the pleated grid and the handle rail that is fixated by means of magnetic profiles in the closed condition.

Due to the low height of the bottom running rail of 8 mm, the pleated blind is considered accessible as per DIN 18025 when it is opened.

Packaging

The low installation depth of 18 mm and the good packaging of the fabric guarantee placement in even the tiniest niche.
