INSECT SCREENS

INSECT ROLLER SCREEN

IS13 Insect roller screen
Integrated insect roller screen
The HELLA insect roller screen offers protection against insects thanks to complete sealing by means of brush inserts in guide rails, cassette and end rod. The spring balancer drive allows for quick opening and closing of the roller blind, whereas a shooting up is ruled out because of the built-in recoil brake.

The compact cassette size of 43x52 mm guarantees placement in every window soffit.
