

HELLA

**AWNING
LOVE**

FOR EACH TYPE, THE ONE

Awnings from HELLA are manufactured to a high standard down to the last detail and create space for relaxed outdoor living with intelligent features. The HELLA awning range features elegant designs, a diverse fabric collection and, depending on the model, smart accessories such as light and heat sources, light sensors, tilt angle adjustment and digital control.

HELLA awnings appear light and floating, almost as if they were weightless. Nevertheless they are considered to be one of the most stable solutions on the market.

Slim, well-designed constructions that can be installed in a space-saving and flexible way, hide the latest technology. Functional textiles of the latest generation absorb heat, reflect sun rays, are weather resistant, tearproof and permeable to air.

Mediterranean ease, alpine solidity, urban style, fancy or linear – the awning becomes a statement that emphasises the architecture and expands the built space functionally and aesthetically.

CASSETTE AWNINGS

HELLA cassette awnings are protected from the weather when retracted. With elegant shapes and a wide range of fabrics, the PAN, C2 and CLEO models blend seamlessly into the architecture. The awnings can be driven by crank or motor and equipped with radio control.

PAN 7040

is an elegant and extravagant awning that retracts upwards and thus disappears completely into a box mounted in portrait format. For purist architectural concepts and special design requirements, the PAN 7040 is the tailor-made sun protection.

C2

Characteristic of this awning is its elegant, flat box in which the fabric and technology are completely stowed away. The C2 impresses with a functional and uncompromisingly modern design, can be coupled modularly and is therefore ideal for large shaded areas.

CLEO

The slim, nicely shaped construction, whose oval cassette enables a space saving installation, seems to hover, when it is nearly weightlessly opened or closed. The lightweight construction and many mounting options make the CLEO flexible to use.

OPEN AND HALF-OPEN

The VIVA and AREIA models round off the range. They are used wherever roof overhangs or balconies are used as weather protection or only a simple cover is required. Like all HELLA awnings, the elegant shade dispensers are made to measure and can be driven by crank or motor.

VIVA

The VIVA plus and VIVA super awnings with many functions

AREIA

The all-round awnings AREIA 7040 and 6030 with superior technology

EQUIPMENT

LED lighting

The awning lighting is optionally available for the AREIA 7040, VIVA, CLEO 7040 and PAN 7040 awnings. Integrated at the bottom of the folding arms, warm-white ambient light illuminates the place below the awning.

Varioplus roller blind

Integrated in the front profile, as additional sun and privacy protection, can be lowered up to 2500 mm depending on awning, drive and fabric selection; Available for AREIA 7040, CLEO 7040, VIVA plus, VIVA super and C2.

Infrared radiant heater

With the infrared radiant heater in white or black, you can enjoy the outdoor living space in a relaxed way even in the transitional period!
